Project Details

What is Yellow Network ?

Yellow Inc., a blockchain product and infrastructure company, aims at building Web3 Internet of Finance, solving the problem of fragmented liquidity across hundreds of Layer-1/2 networks and exchanges.

Yellow Network is a Layer-3 decentralized Broker Creating Network powered by state channel technology used for communicating and trading between brokers and aggregating liquidity of connected nodes.

Built around a robust exchange **Yellow.com**, the platform allows users to gain access to powerful tools to create and manage assets in a compliant way, leveraging state-of-the-art infrastructure, and integrating all the key building blocks of the blockchain ecosystem. The professional team of Yellow experts will support you through the process of tokenizing and promoting your assets.

Use Cases of \$YELLOW

\$YELLOW will bring various use cases to its holders, with four key use cases including:

1. Staking for running broker nodes; the requirement for brokers to run and operate on the network is set to 250,000 \$YELLOW / 4 channels.
2. Liquidity mining through bridging; users can run a Yellow node on any cloud, connect it with their CEX/DEX account and mine liquidity.
3. Delegate your token to a broker; support your favourite broker to scale and pay network fees, allowing you to share the broker's income.
4. Lower trading fees on Yellow; Yellow.com is a retail broker of the network where the trading fee schedule depends on your token balance.

Vesting Schedule

The **Launchblock.com** community who invest in the Token Sale will be subject to the vesting schedules, this is as follows:

Private Round D

Price: \$0.036

Vesting: 2-month cliff, then linear unlock over 24 months.

Token Characteristics

Token Type: ERC-20

Blockchain Network: ETH

Max Supply: 10,000,000,000

Initial Circulation Supply: 40,000,000 (0.4% of max supply)

Initial Circulation Supply Market Cap: \$2,000,000 (initial unlock * public price)

Token Public Round Market Cap (Fully Diluted): \$500,000,000

Project Valuation: \$20M at Seed price

Roadmap

Q2 2022

- Public Beta on Yellow.com
- Public token launch
- Futures trading engine

Q3 2022

- Public release 1.0
- Cross-chain settlements
- Dispute resolution
- Yellow Finance Reward Program

Partners

Yellow.com has created various partnerships with well-known projects within the cryptocurrency space, current partners include:

- **Consensys**; the leading Ethereum software company, enabling developers, enterprises, and people worldwide to build next-generation applications.
- **Polygon**; a well-known blockchain within the space, drives your dApps to the finishing line faster, safer, and without worrying about the gas.
- **Qredo**; New infrastructure for digital asset ownership and blockchain interoperability
- **Fireblocks**; enabling businesses to easily and securely support digital assets and cryptocurrencies.
- **Hacken**; the leading Security Consulting Company with an essential focus on blockchain security.
- **Zokyo**; a venture studio that builds, secures, and funds crypto, DeFi, and NFT companies.
- **GSR**; a world-leading crypto market maker and ecosystem partner
- **Assetum**; market maker

Team

Yellow.com has a solid and experienced team, with a wealth of experience in the cryptocurrency space, the whole team consists of **120+ cryptocurrency enthusiasts spread across various departments**, with the core team including:

Alexis Yellow — Executive Chairman; experience at GSR, Europe's Spaceport and GTD

Bakhtiyar Mamedov — CFO; experience at PWC

Louis Bellet — CEO; experience at Openware, HSBC and HT

Camille Meulien — CTO; experience at Credit Agricole, Societe Generale and Etoro

Sergii Kashchenko — COO; with previous employment at Bitfury
